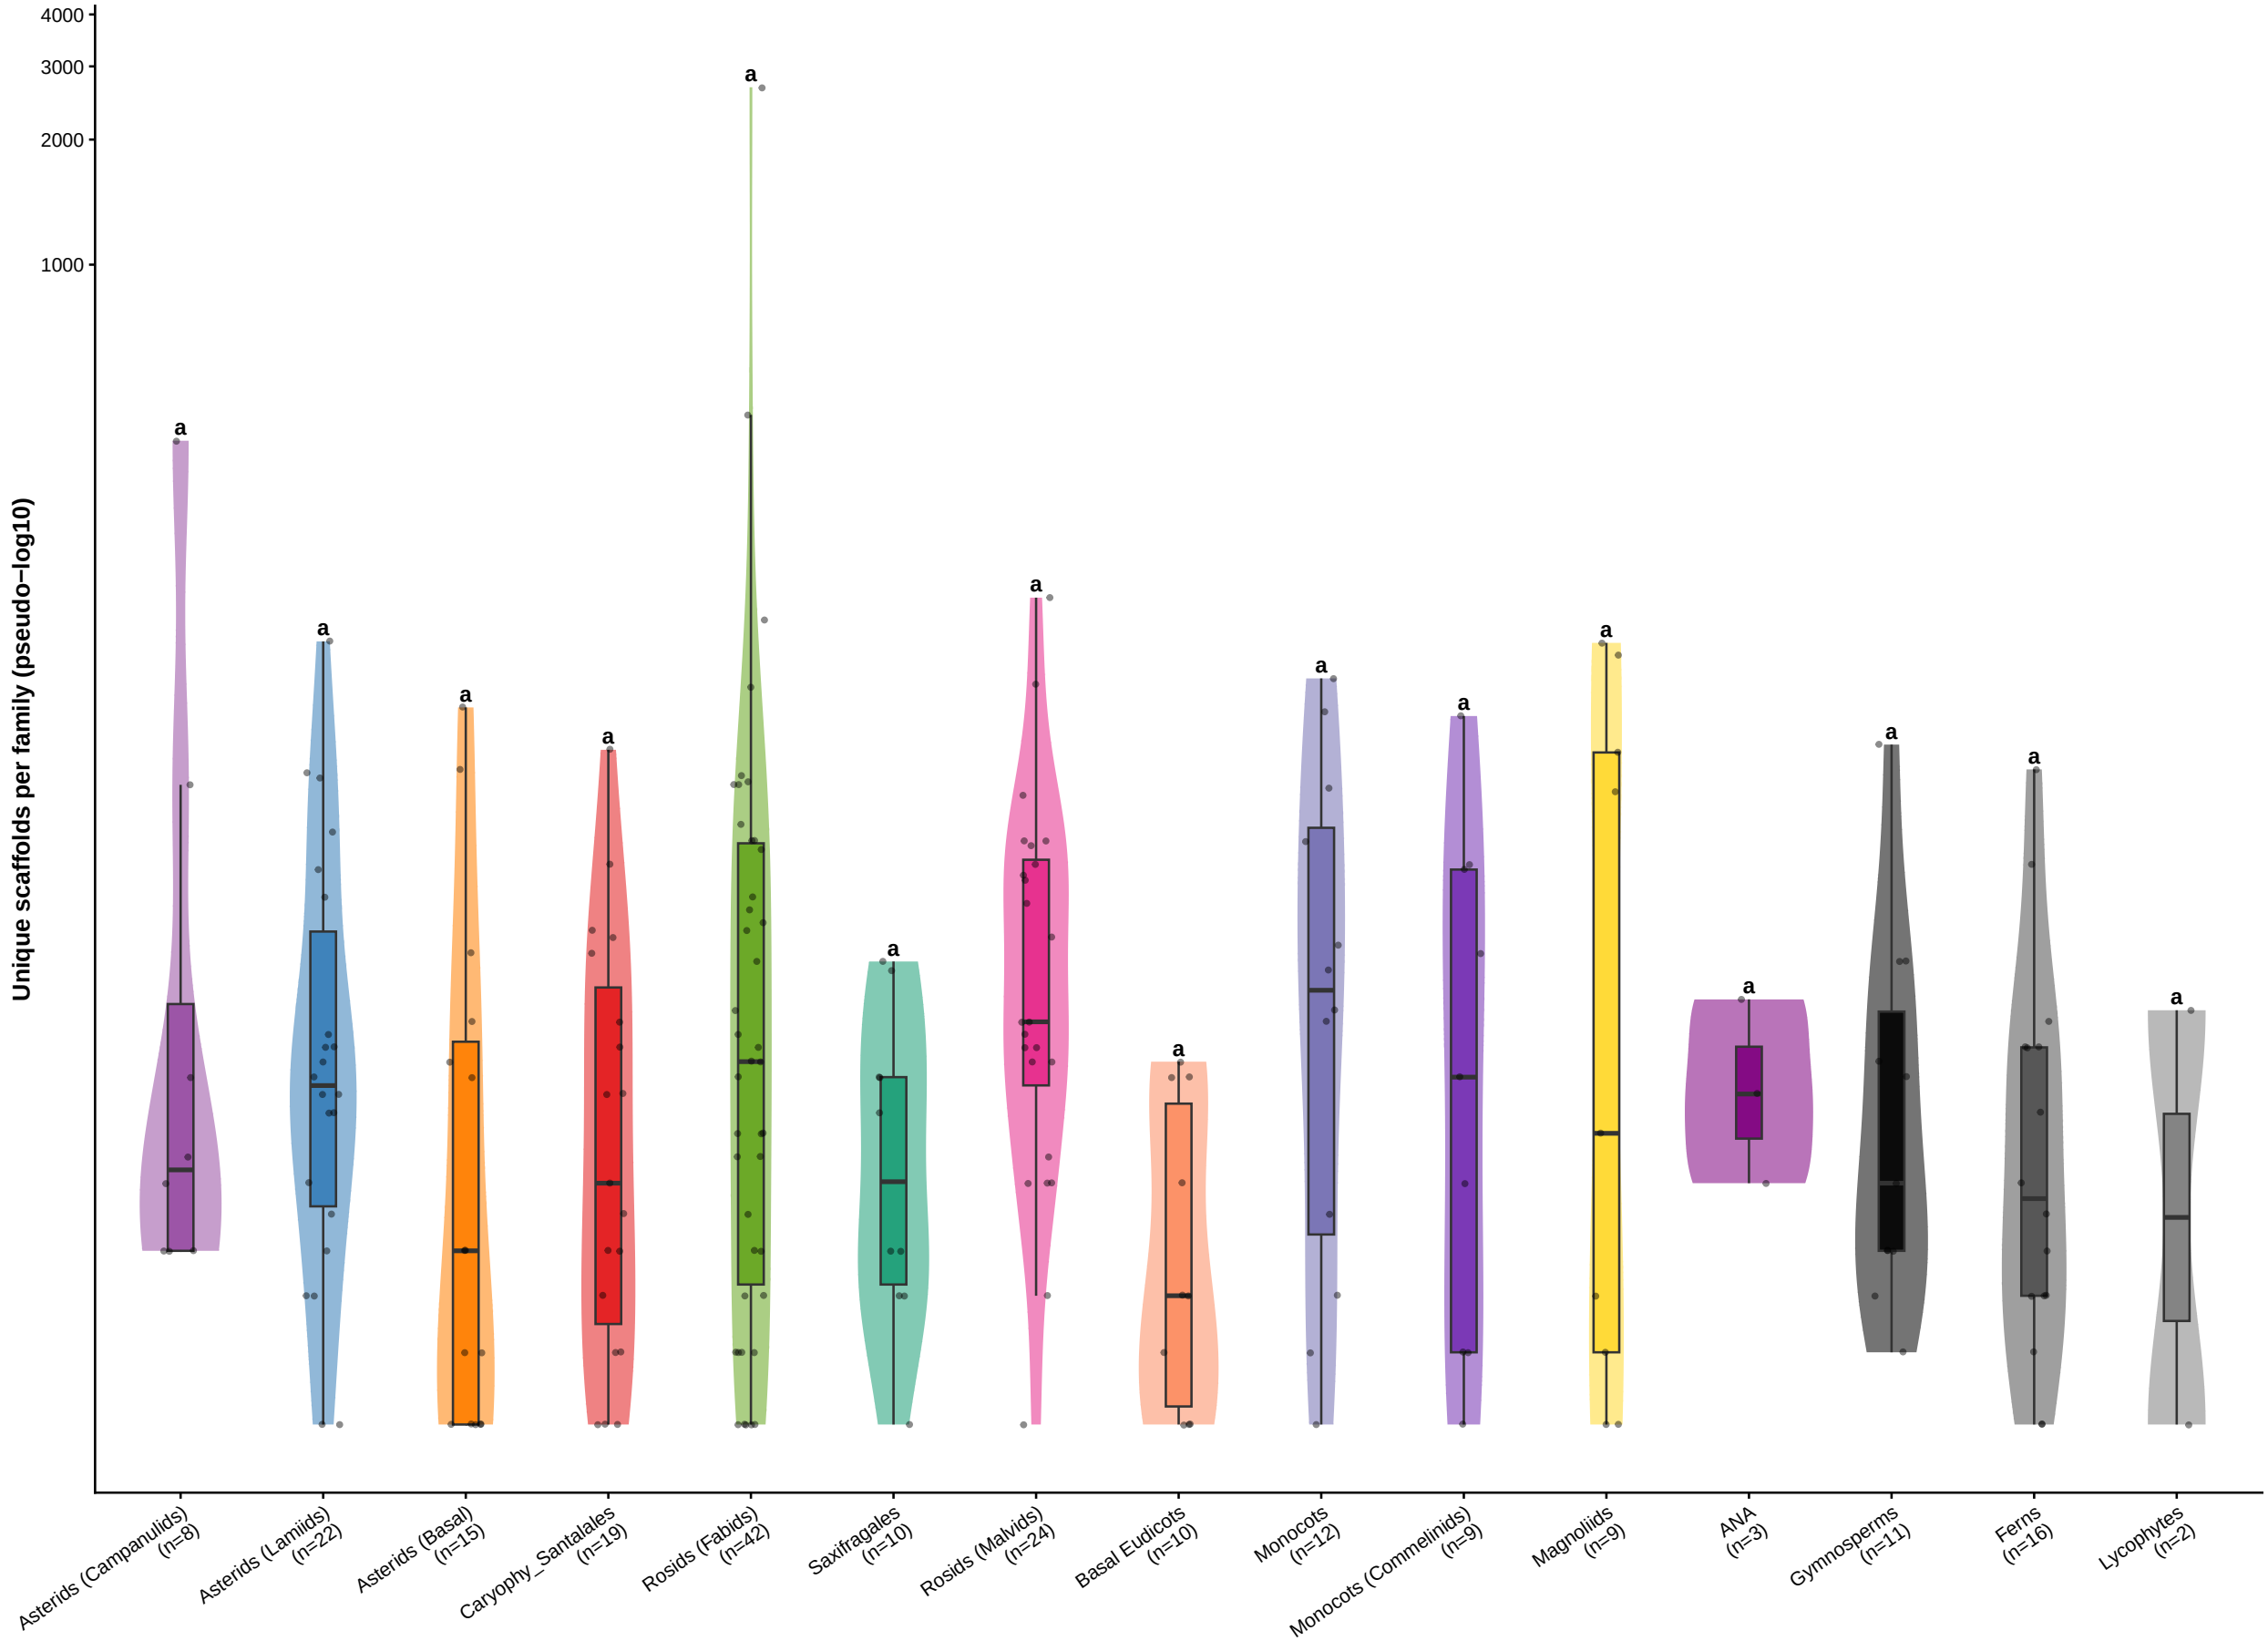
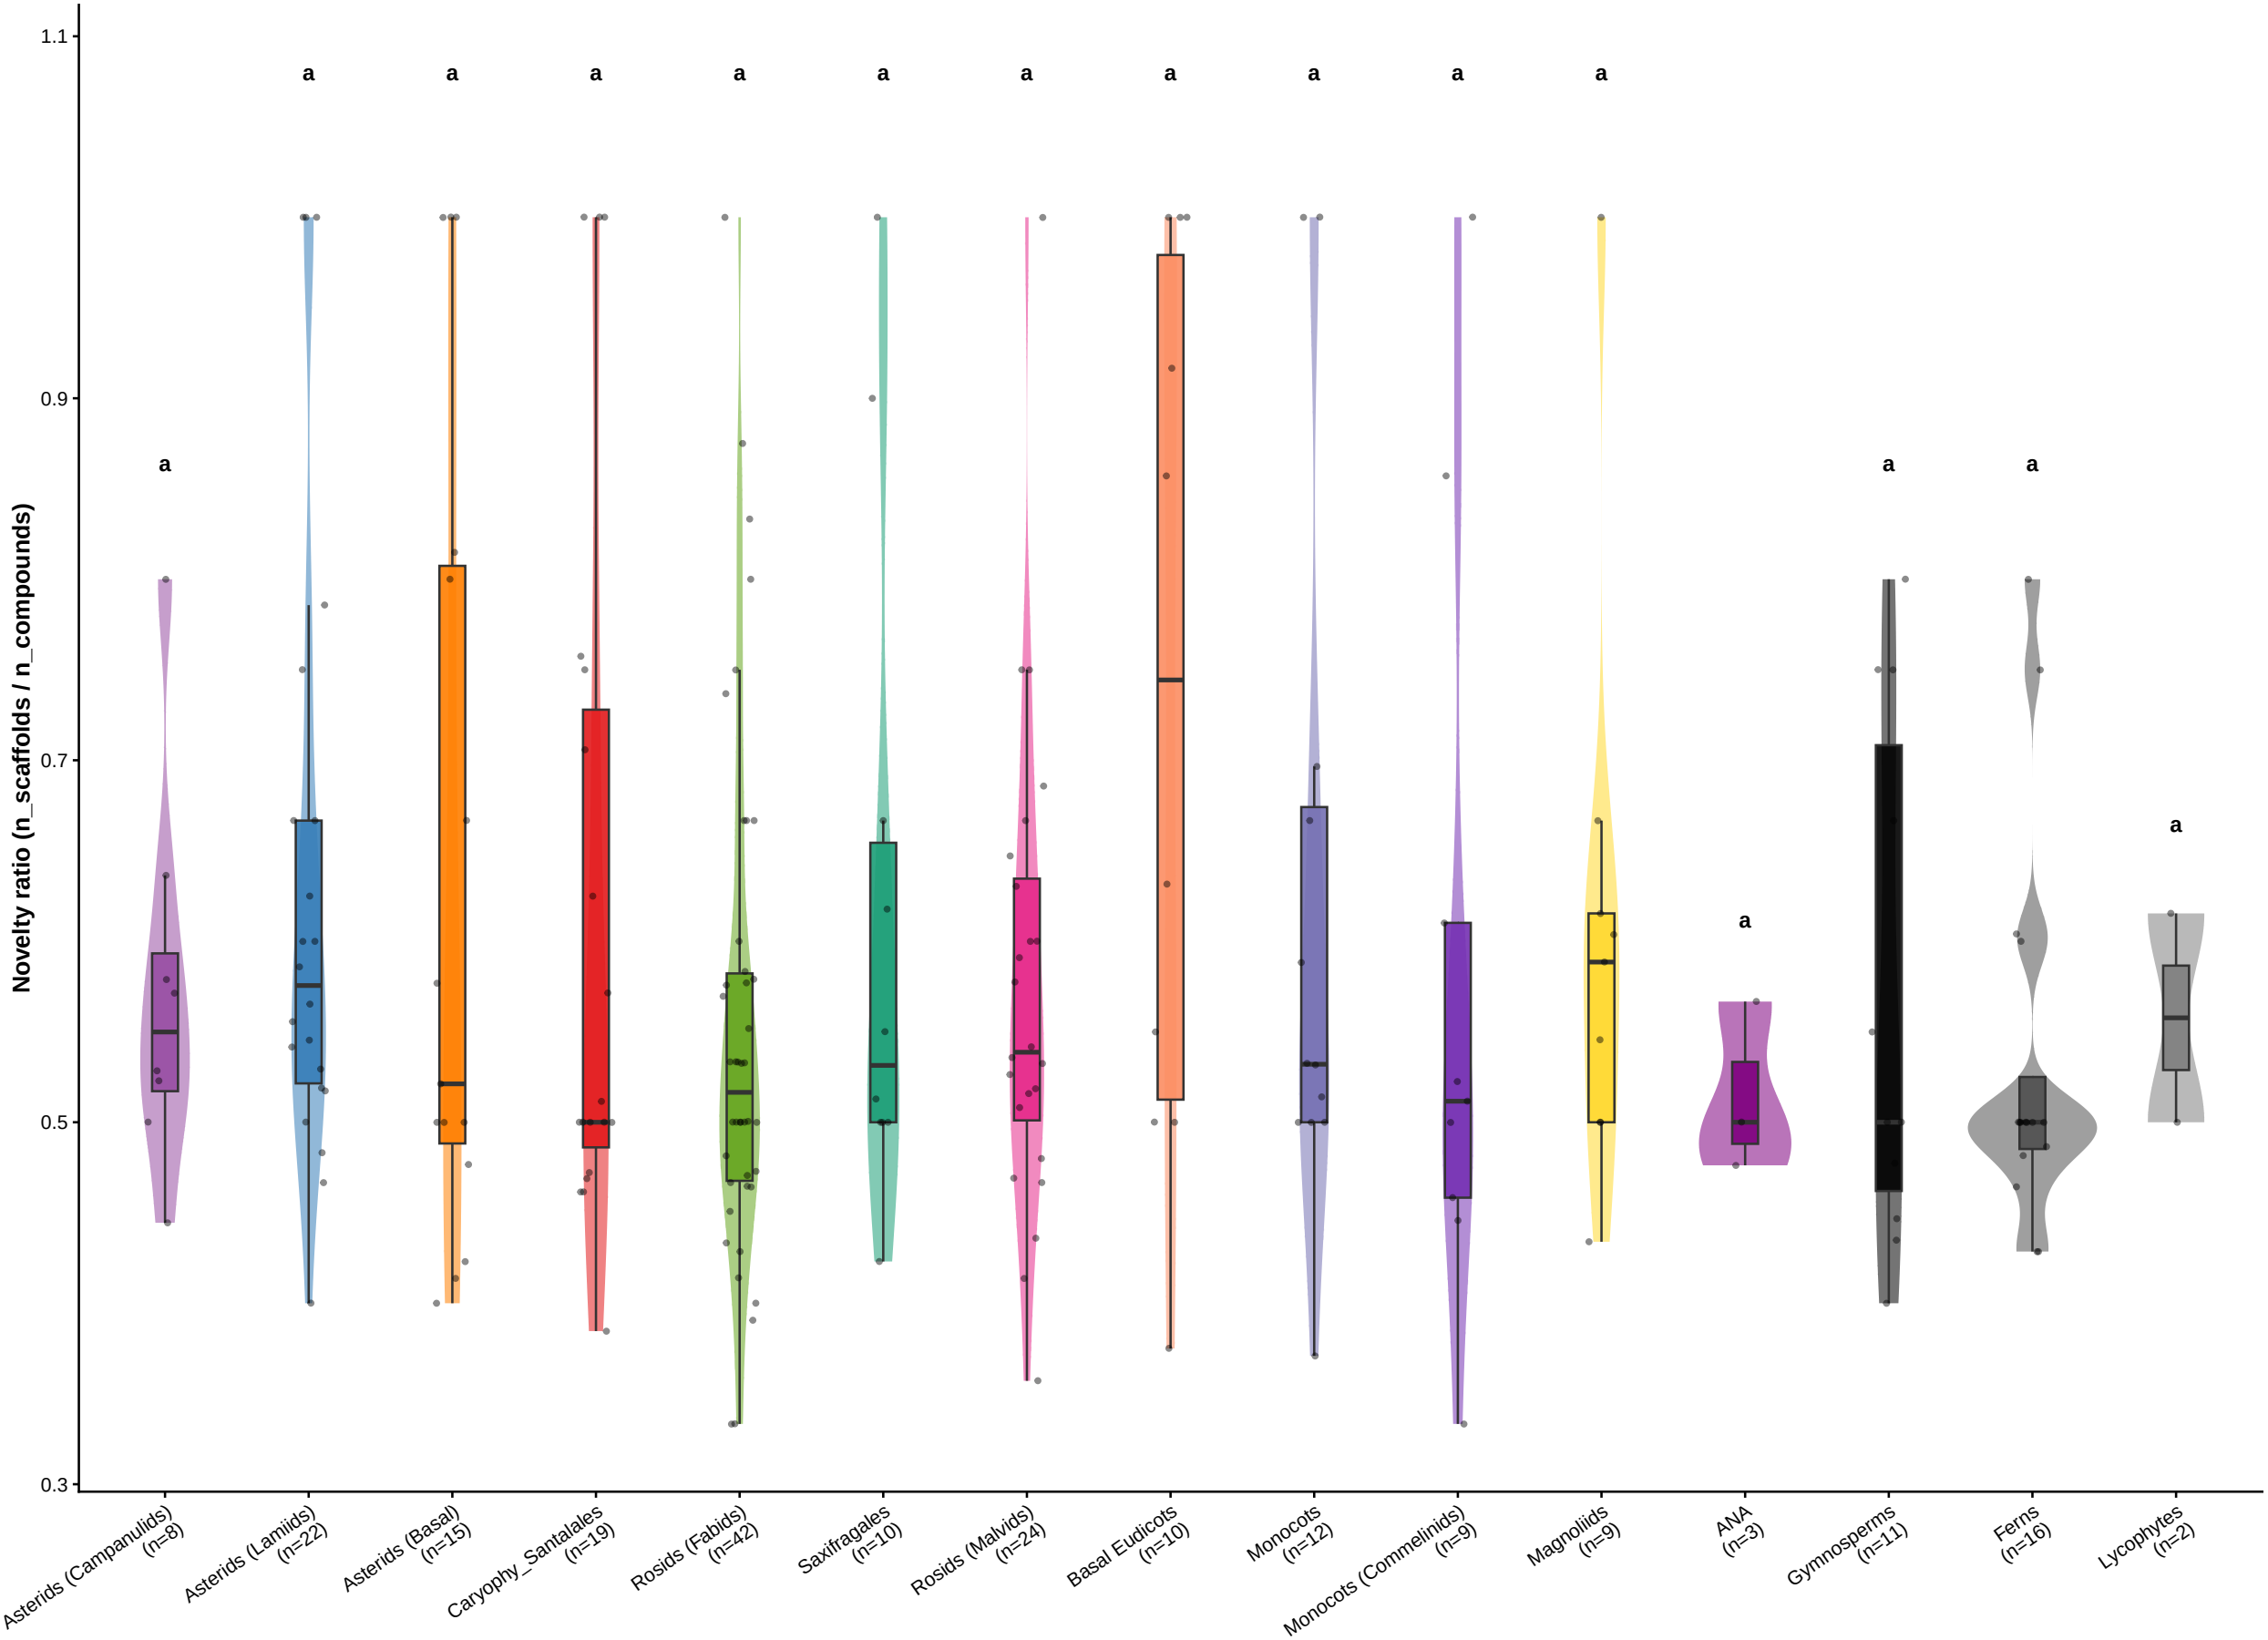
2000
a
Asterids (Campanulids) (n=8)
Asterids (Lamiids) (n=22)
Asterids (Basal) (n=15)
Caryophy_Santalales (n=19)
Rosids (Fabids) (n=42)
Saxifragales (n=10)
Rosids (Malvids) (n=24)
Basal Eudicots (n=10)
Monocots (n=12)
Monocots (Commelinids) (n=9)
Magnoliids (n=9)
ANA (n=3)
Gymnosperms (n=11)
Ferns (n=16)
Lycophytes (n=2)

B Scaffold richness across macro−groups

Kruskalâ€“Wallis p = 0.11 | effect size eps2 = 0.035 | Dunn posthoc: BH−FDR (letters shown when available)



C Structural novelty across macro−groups


Kruskalâ€“Wallis p = 0.55 | effect size eps2 = −0.006 | Dunn posthoc: BH−FDR (letters shown when available)
